Automated Budget and Evaluation System of Texas (ABEST)

776 The University of Texas at Austin Dell Medical School

The University of Texas at Austin (“UT Austin” or “the University”) Dell Medical School (“Dell Med”) is leading the way in improving health and transforming health care, while advancing UT Austin’s bold vision to become the world’s most impactful public research university. Since its formation, Dell Med has made significant impact by attracting top-tier physicians to Austin, who offer patient-centered clinical care and lead groundbreaking research and innovative medical education. Not only does Dell Med educate and train the next generation of physicians, but it is also building powerful community partnerships and fostering transdisciplinary collaborations across the university that will define the future of health care for Central Texas and beyond.

Anchored in Austin, one of the fastest-growing cities in the U.S., Dell Med plays a critical role in the region’s emerging and dynamic footprint as a hub for life sciences and technology, exemplified by the 260-plus life science and health technology companies operating here today. Up until recently, Austin remained the largest city in the country without an academic medical center. As a result, Central Texans were forced to leave the region to seek care for complex medical conditions, but soon, the entire region will have access to vital health care, related to oncology, cardiology, and neurology here at home. Under Dell Med's leadership, we are creating a world-class academic medical center and are establishing Austin as a premier destination for integrated, patient-centered care.

As a leading Tier 1 research institution, UT Austin’s strength has always been its leadership in a broad array of fields and pursuits. Dell Medical School has the unique opportunity – not found elsewhere – to harness UT Austin’s extensive expertise and talent across engineering, life sciences, pharmacy, nursing, social work, and supercomputing to revolutionize how people get and stay healthy. This collaborative approach is poised to drive groundbreaking advancements in patient care and paves the way for us to build modern and innovative hospitals designed to provide excellent, cutting-edge care to Texans. In collaboration with UT Austin, community partners, industry, and the State, Dell Med is seizing a powerful convergence of excellence and opportunity to shape a connected, data-driven, and technology-enabled health care ecosystem that will set new standards for medical innovation for years to come.

History

Dell Medical School began in 2012 when the UT System Board of Regents allocated \$25 million in annual funding for a medical school at UT Austin, plus another \$40 million over eight years for faculty recruiting. That same year, Travis County voters took the unprecedented step of approving Proposition 1, which raised property tax revenue to support a new medical school in Central Texas with an additional \$35 million per year.

In 2013, The Michael & Susan Dell Foundation pledged \$50 million to the school through a naming gift. The UT System Board of Regents then approved a plan to construct three new buildings to house medical education, research, and clinical efforts on the UT Austin campus. Ascension Seton and Travis County’s hospital district, Central Health, confirmed plans to build a new teaching hospital on leased university land in the heart of the burgeoning health district.

In 2016, the medical school welcomed its first class of 50 students and opened the Health Learning Building. The following year, Ascension Seton opened Dell Seton Medical Center at The University of Texas at Austin, the primary teaching hospital for Dell Med, to replace the aging University Medical Center Brackenridge. In the summer of that year, students in Dell Med’s inaugural class began to provide care in hospitals and clinics around Austin as part of clinical clerkships. UT Health Austin (“UTHA”), Dell Med’s innovative clinical ambulatory practice, began seeing patients that fall and more than a third of patients receiving care were in the safety net population.

Dell Med earned full LCME accreditation in 2020, paving the way for its inaugural graduating class and participation in National Match Day. In October of that year, Dell Med physicians at the Texas Center for Pediatric and Congenital Heart Disease performed the first-ever pediatric heart transplant in Austin at Dell Children’s Hospital. That December, Dell Med became part of a coalition that delivered some of Central Texas’ first COVID-19 vaccines.

Administrator's Statement

89th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

776 The University of Texas at Austin Dell Medical School

In 2022, UTHA, in partnership with Ascension Seton, performed the first kidney transplants at Dell Seton Medical Center and launched the first Pediatric Abdominal Transplant Center in Central Texas.

The University of Texas System in 2023 announced the creation of The University of Texas Medical Center, including two new, state-of-the-art hospitals: a specialty hospital owned and operated by UT Austin and a cancer center to be built by MD Anderson. These hospitals are scheduled to open for patient care in 2030 and will be built adjacent to the existing medical education buildings on the former site of the Frank Erwin Center. The University of Texas Medical Center marks a major, multi-billion-dollar investment made by UT System, UT Austin, MD Anderson and philanthropic donors to lead in health and health care transformation. Simultaneously, Dell Med is also significantly expanding its ambulatory practice to increase access to primary care and specialty services in the Austin area.

In alignment with The University of Texas at Austin's key initiatives outlined in its Change Starts Here strategic plan, Dell Med also recently introduced its own plan to support the University's goal of becoming the world's highest-impact public research university. Health Starts Here, launched in Summer 2024, will serve as the strategic plan for the University of Texas Medical Center, anchored by Dell Medical School. The plan outlines strategic priorities of present day through 2030, while serving as a roadmap for Dell Medical School to become a world-class academic medical center.

Medical Education

Dell Med graduated its fifth class in Spring 2024, with 100% of the class matching with residency programs during the initial match period. This was the second year in a row that the school achieved this accomplishment, and the third time in five years. In comparison, the national average match rate is 95.3%.

Dell Med graduates successfully matched at top clinical programs across the country, including 42% of the class of 2024 matching at programs in Texas. The school's unique curriculum allows students to participate in eight dual masters degrees and three distinction programs during their third year. Additionally, it is one of the only programs in the country that provides the opportunity to obtain a master's degree in addition to a medical degree during the traditional four-year medical education timeframe. Notably, over one-third of this year's graduates chose to train in primary care specialties at a time when Texas and the nation are facing historic primary care shortages.

Dell Med graduates in three cohorts have also been recognized with the Excellence in Public Health Award for their unique efforts to advance public health and well-being with programs that address urgent issues like food insecurity and medical debt.

In the coming year, the school's Graduate Medical Education (GME) program will offer 48 residency and fellowship training placements. This will triple the number of GME slots available compared to the initial number sponsored by the school in 2015.

Dell Med is currently training 465 residents who provide nearly 900,000 hours of care at over 60 clinics and hospitals across Central Texas annually. Of Dell Med's 578 residency and fellowship graduates who immediately entered practice since 2015, nearly half remained in Central Texas and more than two-thirds (69%) remained in state, well above the national average of 54%. The geographic placement of residents and fellows is critically important to growing the number of physicians practicing in the region, as studies consistently show that learners are most likely to remain in the communities where they train.

Administrator's Statement

8/14/2024 3:12:15PM

89th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

776 The University of Texas at Austin Dell Medical School

In addition to these milestones, Dell Med has achieved numerous accomplishments that are defining the future of health in Travis County. The school has recruited 445 new doctors to Austin and added 86 faculty researchers with over \$132 million in sponsored projects. This represents roughly 11% of Travis County physicians, and the current practice expansion plan projects that Dell Med will recruit an additional 200 physicians by 2029. These physicians and their teams significantly increased care capacity in Central Texas, from basic services to complex specialties, including world-class cardiovascular care, advanced maternal-fetal medicine for the highest-risk pregnancies, abdominal transplants, and starting soon, Central Texas' first pediatric stem cell transplants for children with cancer.

Patient Care and Clinical Visits

As a community-supported medical school, Dell Med also expanded its partnerships and worked to advance key community health initiatives in the Austin area. In 2023 and 2024, Dell Med faculty partnered with local government and community providers, like Central Health, to advance initiatives related to permanent supportive housing for the homeless population, mental health diversion programs in Travis County, expanded clinical programs for the medically underserved, and improved colon cancer screenings and prevention. Master Service Agreements are in place for musculoskeletal, women's health, and ophthalmology care, in addition to long COVID.

In 2020, Dell Med, joined by UT Austin and other community partners, played an integral part in Central Texas' response to the COVID-19 pandemic. During this period, Dell Seton's patients experienced a survival rate that was twice the average rate of other COVID-19 patients across the country.

The May 2024 opening of the new \$305 million Austin State Hospital, designed in large part by Dell Med faculty, established a new level of comprehensive patient-centered mental health care in the region. Additionally, Dell Med participation in the recently expanded CPAN/TCHAT program allows the school to support improved access to mental health services for thousands of children and adolescents in the region. Dell Med experts also provided support in the development of Travis County's plans for mental health diversion strategies that improve patient outcomes and reduce the burden of mental health-related incidents on law enforcement resources.

In a historic first for UTHA and Dell Children's Medical Center, the Texas Center for Pediatric and Congenital Heart Disease performed only the seventh known pediatric partial heart transplant in the world. Surgeons on the Center's world-class team were among the new doctors Dell Med attracted to Austin.

Dell Med employs 352 regular faculty members that work as clinicians, researchers and/or educators in the Austin community. In collaboration with Ascension Seton, Central Health-affiliated CommUnityCare Health Centers, Lone Star Circle of Care, Integral Care and others, approximately 264 faculty members (75%) provide more than 435,000 hours of part- and full-time clinical care annually in the community, including to patients with low incomes. This expanded practice allows Dell Med to serve as a leader in building a more cohesive, integrated healthcare environment in Central Texas and improve access and quality in the currently fragmented market.

Research and Innovation

Dell Med is already having a greater-than-expected impact on the regional health innovation and life sciences sector – from new research and inventions to catalyzing UT Austin campus collaborations and commercialization. In partnership with other established UT Austin colleges, Dell Med is leveraging new health-related translational research strengths in artificial intelligence (AI), bioelectronic medicine, community health and digital health. These areas complement strong and ongoing collaborations in novel therapeutics, environmental health, and the development of new medical devices.

Researchers at Dell Med also continue to make important discoveries that lead to better understanding of human disease ranging from cancer to mental health illnesses. In

Administrator's Statement

8/14/2024 3:12:15PM

89th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

776 The University of Texas at Austin Dell Medical School

its first decade, the school attracted more than \$100 million in extramural and clinical-trial research funding and demonstrated continuous improvement in the Blue Ridge rankings, moving from #136 in 2018 to #107 in 2023, the greatest increase of any medical school. As part of its strategic plan, Dell Med and UT Austin will continue aggressive efforts to recruit established faculty researchers and increase research funding over the next two years.

Inventions, patents, and new technologies across multiple disciplines have surfaced 43 invention disclosures listing Dell Med faculty or students as inventors, translating into 77 provisional patents, 45 utility patent applications and 12 issued patents. Additionally, 12 existing companies and 5 newly formed companies have executed licenses for Dell Med-associated technology. Cumulative grant funding with filed invention disclosures showed a four-fold increase involving Dell Med compared to published reports and national averages.

This spring, Dell Med launched a new Center for Rare Disease with the Dell Pediatric Research Institute to generate more research on rare diseases. The Center for Rare Diseases will accelerate innovation, research, and education in the field of rare diseases to address the near 3 million Texans and 30 million Americans living with a rare disease. The center will also provide wraparound services that enhance care for individuals with developmental disorders, neurological disorders and learning disabilities.

Dell Med's research efforts are making active contributions to the state's efforts to eradicate cancer. In fiscal year 2024, the medical school had received more than \$10.3 million across six cancer-based research projects from the state-funded Cancer Prevention & Research Institute of Texas (CPRIT). During the 2022-23 biennium Dell Medical School partnered with CPRIT for research on 13 projects totaling more than \$22.4 million. These CPRIT awards target efforts across multiple disciplines in skin, brain, breast, lung, cervical, colorectal, liver, and other internal forms of cancer along with research in childhood and adolescent forms of leukemia, and early data from these projects improved outcomes.

In order to embrace and lead rapidly developing opportunities in the data technology field, Dell Med is also executing a two-part data strategy focused on care provision and innovation and development to expand our current outpatient practice. First, a new electronic health record system is in early-stage implementation, and when combined with data exchanges, will enable a range of improvements in experience and care for all patients especially those who are a part of the safety-net population. Everything from care coordination to referral management to patient engagement stands to improve. The second phase is adoptions of an advanced health data platform to enable research studies, quality improvement and inter-institution collaborations. These strategic efforts are also designed to build services and capabilities that will elevate patient experience in the future UT Austin specialty hospital.

Baseline Request

Dell Medical School does not receive non-formula support item funding nor has the medical school been appropriated funds for debt service. Accordingly, the institution's Legislative Appropriations Request does not include baseline requests for strategies in 2026-27 because formula funding amounts are not determined by institutions.

Formula Funding

The University of Texas at Austin Dell Medical School is one of two health-related institutions in Texas that receive neither non-formula support item funding nor mission specific formula support. In the current 2024-25 biennium formula funding through the Health-Related Institution formulas accounts for 100 percent of state General Revenue appropriated directly to Dell Medical School. While the 88th Legislature made substantive investments in institutions of higher education in Sec. 58, Higher Education Affordability as well as provided increases in mission specific support to certain HRIs via Senate Bill 30, General Revenue support for Dell Medical School in 2024-25 remained effectively flat. At the same time, Dell Medical School held its tuition level while facing extraordinary inflationary and market pressures. We respectfully request increased state investment in the HRI funding formulas, including mission specific, to address these cost pressures and benefit all Texas' Health Related Institutions.

Administrator's Statement

89th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

776 The University of Texas at Austin Dell Medical School

Exceptional Items

Dell Med recognizes the need to revolutionize the delivery of care, the development of the medical workforce and healthcare access throughout Texas.

Texas HealthTech Immersive Learning Laboratory – Dell Med requests a state investment of \$40 million to lead the invention, design and implementation of the next generation of healthcare through the establishment of the Texas HealthTech Immersive Learning Laboratory. The lab aligns with both the University and medical school's strategic plans by effectively integrating AI and new technologies, medical education, clinical care, and discovery research to keep pace with the rapidly evolving healthcare landscape. The novel state-of-the-art Immersive Learning Laboratory will provide realistic, experiential, and immersive training to prepare the multidisciplinary healthcare workforce of the future (including rural areas with limited resources and access), as well as providing a collaborative research and prototyping environment to discover, design, and implement the next generation of digital technologies. Following the initial state investment, recurring costs for the Texas HealthTech Immersive Learning Laboratory are estimated at \$1.5 million per year.

Facilities Needs

If the 89th Legislature considers authorizing Capital Construction Assistance Projects (CCAP), Dell Med respectfully requests \$150 million for a Collaborative Pharmacological Facility between Dell Med and the UT Austin College of Pharmacy (CoP). The Pharmacy Building (PHR) was built in 1952, with an addition dedicated in 1980, together totaling 132,425 gross square feet (GSF). While modern in its day, the building and the addition are unable to keep up with the demands associated with technological advancements and the size of the thriving and expanding program. The CCAP request includes design and construction of the facility in the vicinity and potentially integrated into the site of the Joint Hospital Project. The total square footage of the project is currently estimated at 266,000 GSF and has an estimated total project cost of \$488 million.

The lab project will allow for compliant and technologically advanced space for cutting-edge research on pharmacological projects that are currently being performed in outdated areas that lack compatibility with current standards. CCAP authorization will also support the long-term needs of the college in proximity to the other major components of Dell Med. The institution estimates annual debt service on the CCAP project of \$13,080,000 over a 20-year period at six percent interest.

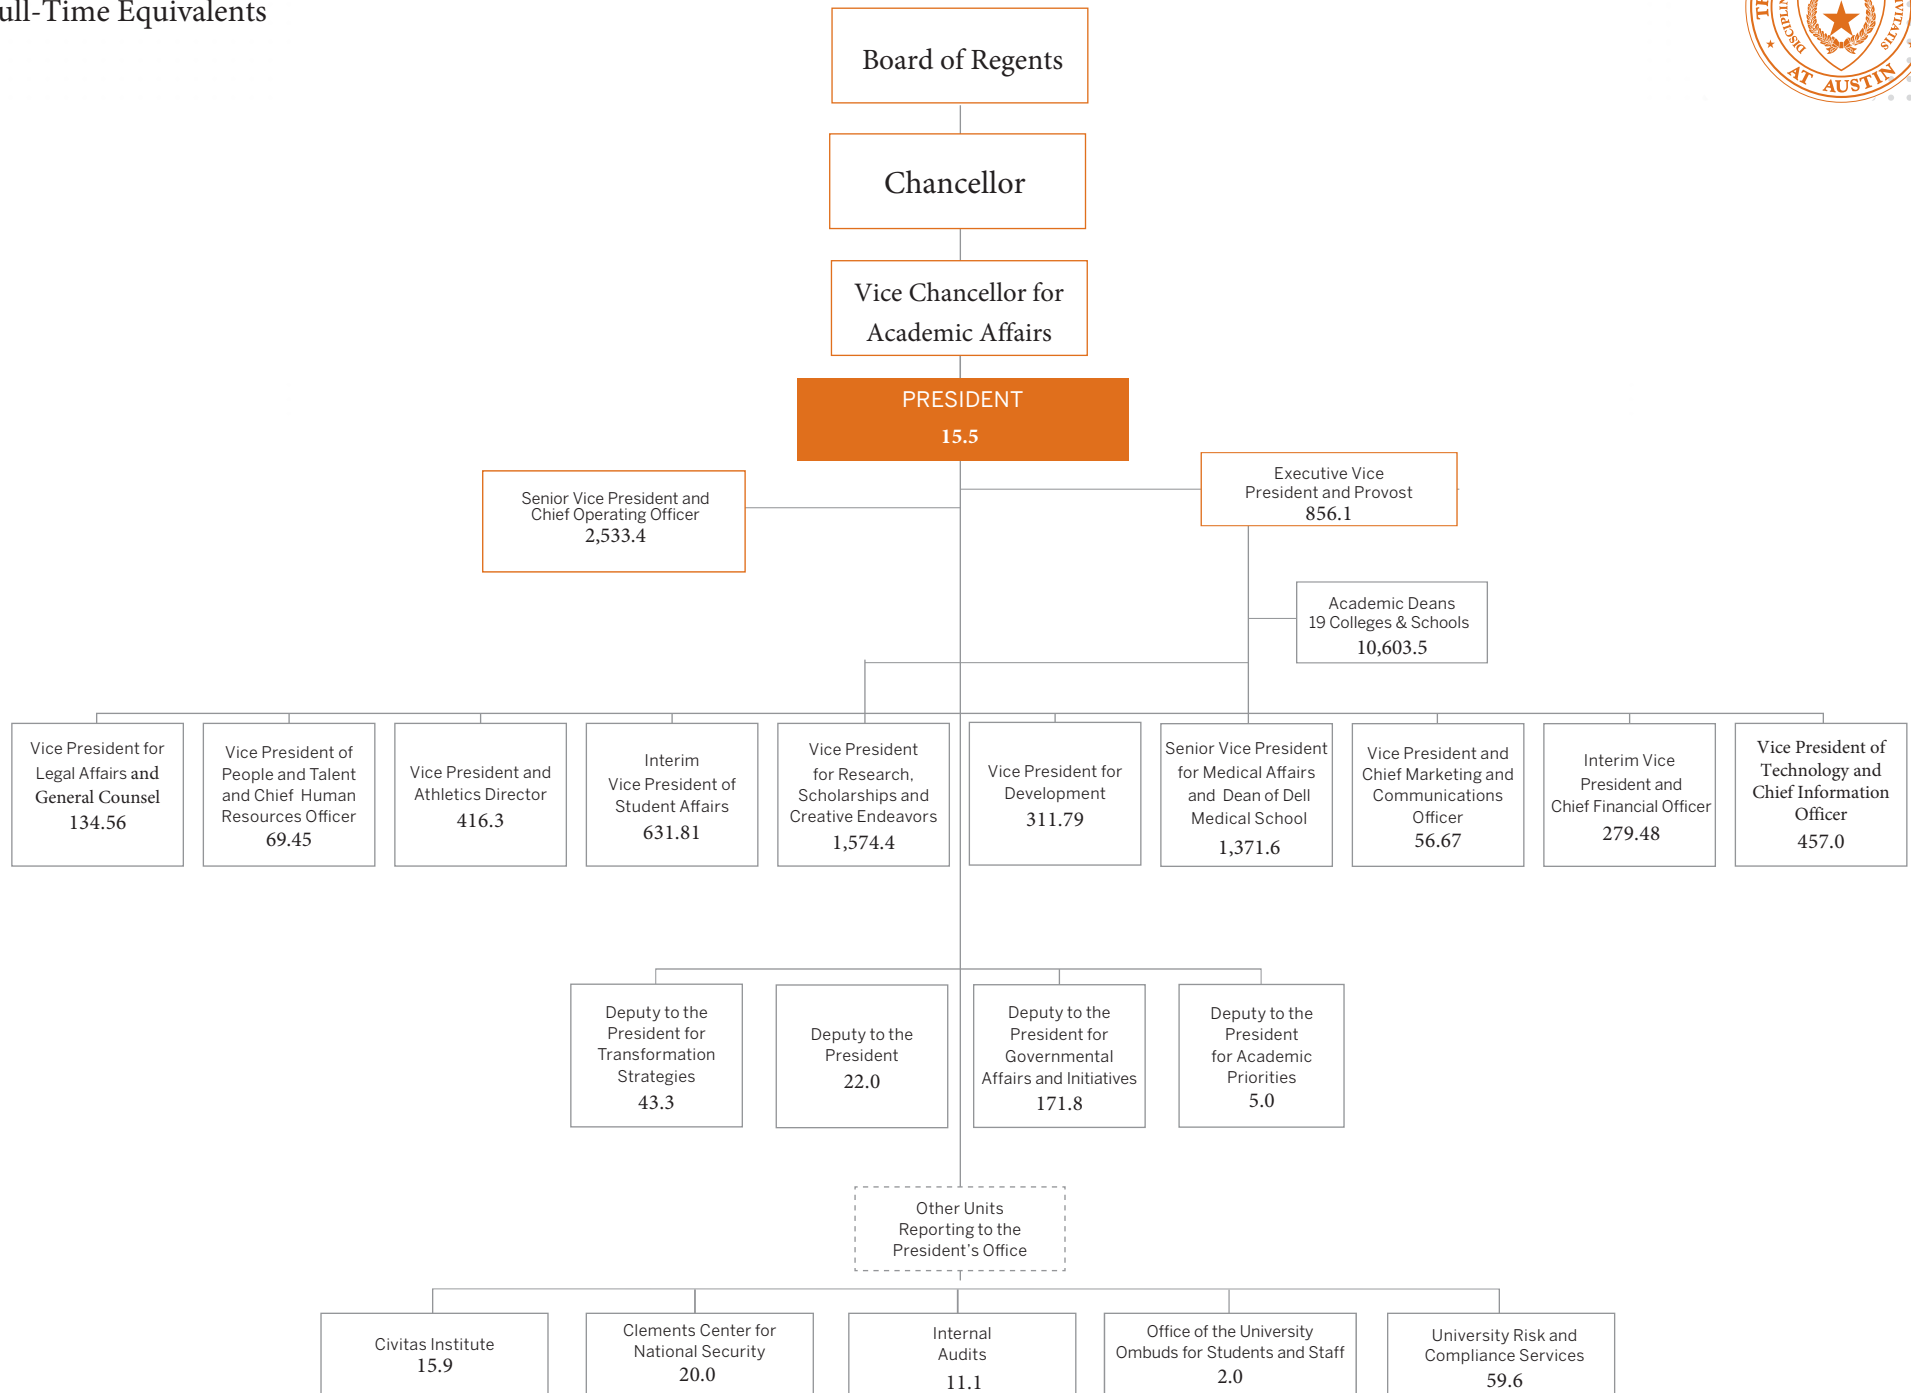

Background Checks

The University conducts criminal background checks on applicants for vacant security-sensitive positions on a post-offer/pre-hire basis pursuant to Section 51.215 of the Education Code as amended. Because of ease of access to students, the University has declared all its positions as security-sensitive.

Conclusion

Dell Medical School, the anchor of The University of Texas Medical Center, is defining the future of health. With a new state-of-the-art UT Austin hospital, a new MD Anderson Cancer Center, and the academic and research expertise of UT Austin, The University of Texas Medical Center will cement Austin as a premier destination for health care alongside other major Texas cities. Working together with the community — and powered by cutting-edge technology and digital capabilities — the medical center will set the standard for excellence in integrated, multidisciplinary patient care, pioneer research with meaningful impact, lead innovation in medical education and catalyze life sciences entrepreneurship. Dell Med respectfully requests that the State continue its strategic investments and looks forward to working with State leadership during the legislative session to meet new challenges and build a stronger and healthier Texas together.

The University of Texas at Austin
 FY 23-24 General Organization Chart with
 Full-Time Equivalents

The University of Texas at Austin Descriptions of Functional Units

Board of Regents – Governing body for The University of Texas System. It is composed of nine Regents and one Student Regent who are appointed by the Governor and confirmed by the Senate.

Chancellor – The Chancellor is the chief executive officer of The University of Texas System. The Chancellor reports to and is responsible to the Board of Regents. The Chancellor heads the System Administration, which is used by the Board to exercise its powers and authorities in the governance of the U. T. System. The Chancellor has direct line responsibility for all aspects of the U. T. System’s operations.

Vice Chancellor for Academic Affairs – Works regularly with the presidents of the nine academic institutions, ensuring that the missions of the institutions are advanced and appropriate plans and programs are developed and implemented. The responsibilities of the office include oversight of administrative and policy issues related to the general academic institutions and monitoring a wide range of issues related to higher education policies and practices.

Office of the President - The President is the chief executive officer of the University and exercises broad delegated authority for campus administration.

University Risk and Compliance Services – Is responsible for the strategic design and implementation of the Compliance and Ethics Program. It provides education and training for faculty/staff to help develop strategies to avoid compliance and ethics failures. Oversees the security of the university’s Information Technology resources and the existence of a safe computing environment to support the university’s teaching, research, and public service missions.

Office of Governmental Affairs and Initiatives – Assist University administration in working with local, state and federal governmental entities on matters of higher education policy, as well as implementing certain presidential and strategic initiatives, including OnRamps.

University Marketing and Communications – Manages media relations, researches, writes, designs, shares, and broadcasts content across print and digital platforms to elevate the brand and experience to generate increased investment and support to attract top students, faculty, and staff.

The Academy of Medicine, Engineering, & Science of Texas – Composed of the Texas-based members of the three National Academies (National Academy of Medicine, National Academy of Engineering and National Academy of Sciences), the Royal Society and the state’s 11 Nobel Laureates. It brings together the state’s brightest minds in medicine, engineering, science and technology to foster collaboration, and to advance research, innovation and business in Texas.

Office of Internal Audits - A service organization dedicated to assisting managers at all levels in the effective discharge of their duties and managing internal controls to successfully achieve their department's as well as the University's goals and objectives.

Civitas Institute – A nonpartisan education and research center focused on the teaching, understanding and appreciation of American values that serve as the foundation for a free and enduring society, including constitutionalism, limited government, free enterprise and markets, and individual liberty.

Clements Center for National Security – A nonpartisan research and policy center that draws on the best insights of diplomatic and military history to train the next generation of national security leaders.

Office of the Vice President for Development - Supports the University's fundraising efforts, working closely with the university's deans and program directors.

Office of the Vice President and Chief Financial Officer - Oversees a diverse array of financial, business, procurement and payment service units. Through the responsible planning and management of the university’s resources, Financial and Administrative Services supports and enhances its core mission to be more effective, efficient, and achieve operational excellence.

Office of the Executive Vice President and Provost – Coordinates the academic mission of the University, manages the academic experience for students, and implements policies and procedures related to faculty and administration.

Division of Student Affairs - Facilitates students' discovery of self and the world in which they live while enhancing students' educational experiences through programs and services that support academic success, physical and mental wellness, student development, leadership, and community engagement through an array of programs, spaces, and resources.

Office of the Vice President for Legal Affairs and General Counsel - The chief legal officer and general counsel of the University, serving as the University's representative in state and national discussions on legal and policy issues. Responsibilities of the office include managing and coordinating legal affairs, serving a resource for ethical informed decision-making, educating personnel and providing training, overseeing campus safety.

Office of the Vice President and Director of Athletics - Provides opportunities and support for university student-athletes to achieve academically and compete athletically at the highest level and provide programming and resources that help prepare them with skills for life.

Office of the Vice President for Research, Scholarship, and Creative Endeavors - Coordinates research throughout the University and handles applications for research funding, coordinates strategic areas of research focus and tracks guidelines and regulations governing research.

Office of the Senior Vice President and Chief Operating Officer - Oversees a diverse array of financial, business, physical infrastructure, and operational service units whose responsibilities include managing a number of the University's key development and commercialization partnerships with business and industry.

Office of the Vice President of People and Talent and Chief Human Resources Officer – Oversees the central Human Resources organization and responsible for the development and implementation of a staff talent management strategy.

Office of the Vice President of Technology and Chief Information Officer – Responsible for the provision of the core information technology infrastructure and coordination of campus-wide information technology for the University providing foundational IT services effectively and efficiently to support the University's educational, research, and public service mission.

Transformation Strategy office – Oversees the planning, execution, and delivery of university-wide strategic change outlined in the University's 10-year strategic plan, *Change Starts Here*.

Dell Medical School - Provides medical education and health care to improve health outcomes by offering opportunities and support for students to excel academically in the medical field through innovative clinical training and equips them with the skills needed to lead and advance health care in their communities and beyond.

Office of the Student/Staff Ombudsperson – Assists in resolving student/staff problems, concerns, and complaints. Also helps University officials including faculty, and administration by providing information and problem solving.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, student services and institutional support. The formula for this strategy is based on weighted medical student headcounts. The rate per weighted student headcount or full time equivalent is established by the Legislature each biennium.

DESCRIPTION / JUSTIFICATION:

The University of Texas at Austin Dell Medical School requests \$40 million to establish the Texas HealthTech Immersive Learning Laboratory to provide realistic, experiential, and immersive medical training for healthcare professionals to master new clinical tools and discover the next generation of digital technologies in healthcare. The Lab will also have the capability to deliver tele-immersive virtual experiential experiences to healthcare providers in rural Texas engaging healthcare professionals throughout the state.

One-time estimated costs include \$20 million to design and construct the Texas HealthTech Immersive Learning Lab on the site of the future The University of Texas Medical Center. Additional one-time funding requests to establish the Lab include \$17 million to purchase state-of-the-art immersive equipment and data infrastructure to house computing capacity to produce AI-driven and robotic scenarios.

Recurring costs of \$1.5 million per year are included to staff the Texas HealthTech Immersive Learning Lab.

EXTERNAL/INTERNAL FACTORS:

Tomorrow's challenge for healthcare providers involves the application of emerging artificial intelligence and machine learning approaches to generate well founded predictions that can optimize clinical decision-making and patient outcomes. By integrating AI technology, medical education can keep up with the rapidly evolving healthcare landscape and provide high quality patient care. Today's simulation centers play a critical role in healthcare training by allowing learners to experience a wide range of clinical scenarios without jeopardizing the health and safety of patients. However, existing simulation centers are limited to teaching current treatments.

Agency name: **The University of Texas at Austin Dell Medical School**

CODE	DESCRIPTION	Excp 2026	Excp 2027
-------------	--------------------	------------------	------------------

The Texas HealthTech Immersive Learning Lab will provide realistic, experiential and immersive medical training for healthcare professionals to master new clinical tools, develop the workforce of the future to discover the next generation of healthcare. The Lab will construct virtual digital twins of patients and populations to model their physical counterparts. Continuously updated bidirectional interactions between the virtual and physical entities provide a range of future trajectories to inform healthcare providers as they deliver patient care.

Additionally, Immersive Services (XR) technologies such as augmented, virtual, and mixed reality coupled with advanced haptics can be developed and tested in a safe environment.

The Texas HealthTech Immersive Learning Lab will overcome healthcare barriers in rural Texas by bringing state of the art training to healthcare providers in remote and rural areas. Tele-immersive virtual experiential educational platforms will allow remote learners to engage with new technologies. Advanced simulations will be tailored to individual learning needs, adjusting scenarios to match the learner's skill level, specialty, and learning objectives producing a Texas healthcare workforce capable of using modern tools and technologies to care for the entire state.

PCLS TRACKING KEY:

DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :

Initial salary costs will allow staff to install equipment and establish the Texas HealthTech Immersive Learning Lab’s educational platforms. Ongoing salary costs beyond the 2026-27 biennium are estimated at \$1.5 million per year.

DESCRIPTION / JUSTIFICATION:

UT Austin Dell Medical School's request for Capital Construction Assistance Project (CCAP) support will provide modern, state-of-the-art space between The University of Texas at Austin Dell Medical School and the College of Pharmacy (CoP). The Pharmacy Building (PHR) was built in 1952, with an addition dedicated in 1980, together totaling 132,425 gross square feet (GSF). While modern in its day, the building and the addition are unable to keep up with the demands in both technological advancements and scope. The program is currently spread across multiple locations: the Pharmacy Building (PHR), Biomedical Engineering Building (BME), Department of Pediatric Research Institute (DPRI; located off-campus), and the Health Discovery Building (HDB). The CoP also utilizes space in the Animal Research Center (ARC) and numerous Core Facilities around campus.

The project includes design and construction of new collaborative facility totaling nearly 266,000 gross square feet in the vicinity and potentially integrated into the site of the Joint Academic Medical Center that The University of Texas at Austin Dell Medical School is planning in collaboration with MD Anderson Cancer Center. The project will allow for compliant, technologically advanced and accommodating space for cutting-edge research on pharmacological projects that are currently being performed in outdated areas that lack compatibility with current standards.

EXTERNAL/INTERNAL FACTORS:

CCAP authorization will support the long-term needs of UT Austin Dell Medical School and the College of Pharmacy. The total estimated cost of the 266,000 GSF facility is \$488 million, of which UT Austin Dell Medical School is requesting \$150 million in CCAP support from the state.

Debt assumptions: \$150,000,000 CCAP with an interest rate of 6% annualized over a twenty year period.

Location of Facility: On-campus	Type of Facility: Lab/Research Space			
Project Start Date: 09/01/2025	Project Completion Date: 09/01/2031			
Gross Square Feet: 266,000	Net Assignable Square Feet in Project 266,000			

Project Description

UT Austin Dell Medical School's request for CCAP support will provide modern, state-of-the-art space between Dell Medical School and the College of Pharmacy (CoP). The Pharmacy Building (PHR) was built in 1952, with an addition dedicated in 1980, together totaling 132,425 gross square feet (GSF). The program is currently spread across more than four buildings on campus.

The project includes design and construction of new collaborative facility totaling nearly 266,000 GSF in the vicinity and potentially integrated into the site of the Joint Academic Medical Center that DMS is planning in collaboration with MD Anderson. The total estimated cost of the 266,000 GSF facility is \$488 million, of which UT Austin Dell Medical School is requesting \$150 million in CCAP support from the state.

Debt assumptions: \$150,000,000 CCAP with an interest rate of 6% annualized over a twenty year period.

776 The University of Texas at Austin Dell Medical School

Texas HealthTech Immersive Learning Laboratory

(1) Year Non-Formula Support Item First Funded: 2026
Year Non-Formula Support Item Established: 2026
Original Appropriation: \$38,500,000

(2) Mission:

The mission of the Texas HealthTech Immersive Learning Laboratory at The University of Texas at Austin Dell Medical School is to provide realistic, experiential and immersive training for healthcare professionals to master new clinical tools and discover the next generation of digital technologies in healthcare.

(3) (a) Major Accomplishments to Date:

N/A

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The Texas HealthTech Immersive Learning Laboratory is expected to accomplish its mission in five main areas over the next two years:

1. Design and Construct the Texas HealthTech Immersive Learning Lab.
2. Purchase state-of-the-art immersive equipment and data infrastructure.
3. Construct virtual digital twins of patients and populations to model their physical counterparts.
4. Begin developing and testing of Immersive Services (XR) technologies such as augmented, virtual, and mixed reality.
5. Begin developing state-of-the-art training that can be accessed by healthcare providers in remote and rural areas.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

None.

(5) Formula Funding:

None.

(6) Category:

Instructional Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

N/A

776 The University of Texas at Austin Dell Medical School

(9) Impact of Not Funding:

Tomorrow's challenge for students, educators, and healthcare providers involves the application of emerging artificial intelligence and machine learning approaches to generate well founded predictions that can optimize clinical decision-making and patient outcomes. Today's simulation centers play a critical role in healthcare training by allowing learners to experience a wide range of clinical scenarios without jeopardizing the health and safety of patients. However, existing simulation centers are limited to teaching current treatments rather than training providers to use or develop new and emerging technologies. With the emergence of The University of Texas Medical Center, Dell Medical School is uniquely positioned to integrate AI technology and healthcare so medical education can keep up with the rapidly evolving healthcare landscape and provide prospective healthcare professionals with the knowledge and skills they need to deliver high quality patient care.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Development of the HealthTech Immersive Learning Lab will result in ongoing operational costs to staff the Lab. The exceptional item request is that General Revenue from the state provide Dell Medical School with the funds to design and construct the Lab as well as the needed equipment and computing capacity. Ongoing salary costs of \$1.5 million per year are estimated beyond the 2026-27 biennium.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

Specific performance criteria for the Lab can be found in each of the five activity areas referenced in Major Accomplishments Expected in the Next Two Years.
